PROJECT COORDINATOR | TECHNICAL OPERATIONS SUPPORT

Operations-focused professional currently supporting robotics R&D programs at Tesla through hands-on execution, cross-functional coordination, and process discipline. Known for reliability in fast-paced environments, strong documentation habits, and proactive issue escalation. Seeking expanded scope as a Project Coordinator to support planning, execution tracking, and continuous improvement across technical programs.

CORE COMPETENCIES

Project & Execution Support

Project Coordination (Execution-Focused), Cross-Functional Communication, Issue Identification & Escalation, Risk Tracking & Documentation, SOP Adherence & Improvement, Process Consistency & Quality Control

Technical & Data

Robotics Data Collection & Labeling, QA / Testing Support, Python, SQL, Pandas, Data Analysis & Validation, Workflow Automation (Basic)

Tools

JIRA, Confluence, Notion, Tableau, Excel (Advanced), Google Workspace, Slack, Firebase

PROFESSIONAL EXPERIENCE

TESLA - Palo Alto, CA

Data Collection Specialist - Optimus | Feb 2025 - Present

- Support robotics R&D programs by executing structured testing and data collection protocols in real-world environments.
- Coordinate daily execution activities with engineering, data, and operations teams to maintain testing continuity and delivery velocity.
- Identify, document, and escalate hardware, software, and data-quality issues in real time to support rapid iteration cycles.
- Maintain accurate execution logs, test records, and SOP-aligned documentation to ensure traceability and repeatability.
- Contribute to standardization of data-logging and documentation practices, improving consistency and reducing test re-runs.
- Provide timely feedback to engineering teams to help unblock issues and improve system reliability.

Internal Signal: Trusted execution operator with strong process discipline and communication habits.

PROJECT & INITIATIVE EXPERIENCE

BAGENTAI - Remote

Founder & Project Lead | 2025 - Present

- Scoped and delivered small AI-driven workflow automation projects for business clients.
- Gathered requirements, documented workflows, and coordinated implementation timelines.
- Managed client communication and ensured delivery aligned with agreed scope.

NEPINBAY - CA

Founder & Product / Project Owner | 2025 - Present

- Built and launched a community web platform from concept to deployment.
- Defined requirements, prioritized features, and coordinated development tasks.
- Implemented data submission workflows and map-based search functionality.
- Iterated on features based on user feedback and operational constraints.

OPERATIONS EXPERIENCE

YANCEY'S FANCY - Corfu, NY

Operations Lead | Jul 2023 - Jul 2024

- Supported daily production operations and coordinated team schedules.
- Identified packaging-line bottlenecks and implemented workflow adjustments.
- Contributed to process improvements that increased throughput by ~15-20%.

EDUCATION & CERTIFICATIONS

Project Management Certificate (Bootcamp)

Florida A&M University - In Progress (Expected 2026)

AI Agents Intensive Certificate

Google x Kaggle - Issued Dec 2025

B.S. Business Administration, Minor in Information Systems

San Francisco State University - 2023
